ly and Machinery House. Not that most of you need to know how we have kept up with the march of progress and market price and in the promptest manner possible. We have one of our lines on these pages and invite them to meet us

QUALITY

SERVICE

**Standardized
by Choice of
Majority**

"Standard"
Split Iron Pulley.

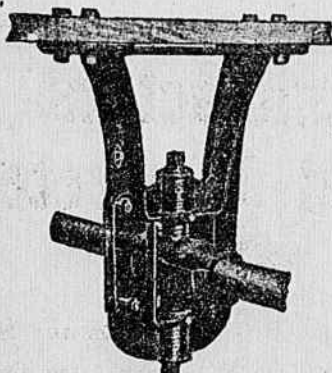

Safety Collars
Solid and Split.

Ribbed Compression
Coupling.

Dodge Flange
Coupling.

Ball and Socket Shaft Hanger
with Self Oiling Bearing.

ANY of the large manufacturers of the country have decided upon the Dodge line as their shop standard. The Corn Products Refining Co., Argo, Ill.; the Buick Motor Co., Flint, Mich.; Morgan & Wright, Detroit, Mich.; Postum Cereal Co., Battle Creek, Mich.; Kellogg Toasted Corn Flake Co., Battle Creek, Mich., and hundreds of others have their big plants equipped with Dodge pulleys, hangers and self-oiling bearings, etc. *There is a reason.* The split feature and interchangeability, the elimination of friction, all have been advanced to a point that none can rival. The matchless design, the master construction and finish of every article in the Dodge line—are all focused on these features. Power conservation, power economy and service at their utmost are thus attained. **WE CARRY IN STOCK** split wood and iron pulleys, friction clutches, collars, couplings, hangers and self-oiling bearings on which we are prepared to make **QUICK DELIVERY.**

LET US SUPPLY
YOUR REQUIREMENTS

SMITH-COURTNEY CO.

Lunkenheimer "Renewo" Valves

*The Kind That Knowing
Engineers Prefer to
All Others.*

They meet the requirements of the trade for a valve similar to the well-known LUNKENHEIMER REGRINDING VALVE, but with the additional features of a renewal seat.

They are practically indestructible, as all parts subjected to hard wear can be easily renewed.

An inspection of the LUNKENHEIMER "RENEWO" Valve will easily prove its superiority over other similar devices.

Send for booklet, prices, etc.

CONGRESS Will Not "Probe" PHOENIX Leather Belting

It's above suspicion, and there is no stock jobbing nor watered values connected with it.

PHOENIX BELTING suits all parties, for it's a product that's never below a true par value.

It always declares dividends on the original investment, and it's a safe stock for you to invest in.

PHOENIX BELTING will prove all the claims made for it.

"Remember the Main"

And Most Prominent Points of

VICTOR-BALATA

are the flexibility and great strength which make it just the proper belt for those extra hard drives in your factory.

VICTOR-BALATA will outpull, also outlast, all other Balata Belts. FACT.

There are reasons why. It is the result of long experience or a combination of the KNOW HOW and QUALITY MATERIAL. Victor-Balata has been in America for over fifteen years. It's no mushroom proposition.

A Roofing for the Future

Not a fair protection for a few years, but a permanent, substantial roof that you can always rely on. A clean, wholesome, well-ordered roof, the elimination of trouble and worry, a roofing whose superiority over others is like the comparison of granite to putty.

Rex Flintkote Roofing

We don't ask you to take our statements—we ask you to investigate and prove for yourself.

A TRIPLEX BLOCK

Lending a Hand

Hung on a trolley, suspended from a jib crane, and equipped with a simple pair of hooks, this Triplex Block picks up all sizes of sheets, hands them to the punch, permits them to be quickly adjusted to the right position, and the instant the work is finished they are swung out of place.

This is only one of hundreds of services performed by the Triplex Block in handling heavy work.

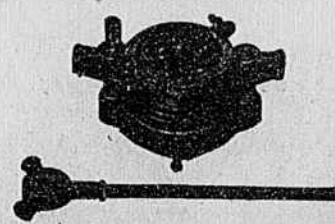

The jib crane and trolley are both inexpensive installations, and with fixed trolleys and switches running through the plant, the problem of serving every kind of heavy machine and of handling every conceivable form of work is reduced to the simplest form.

CHAIN BLOCKS.—4 Styles: Differential, Duplex, Triplex, Electric. 41 Sizes: One-eighth of a ton to forty tons. 300 Active Stocks ready for instant call all over the United States.

Send for the Book of Hoists to-day. Yours for a post-card.

Pipe Tools for plumbers and steam fitters, including Power and Hand Threading Machines, Cutters, Chain Tongs and Small Stocks and Dies.

have to sell. There are to be found in our mammoth warehouse Track and piston packings, Circular, Cross-Cut and Band Saws, Powder, Dynamite, age that we are the Largest Supply and Machinery House in the South and together with our president, wants to meet you on this tour and tell you
